S&P/TSX 60 INDEX LINKED TERM DEPOSIT PERFORMANCE*

Monthend as of :

Jun 2010

* Please note: Any return calculated prior to the deposit's maturing date is theoretical. The return is calculated using the average return of the S&P/TSX 60 Index for the 3 years of the investment period. The average is calculated by adding the Valuation Date Closing Values of the Index for 3 years (36 months) and dividing the sum by the Total Number of Months (36). This average is then compared to the Opening Value of the Index to determine the percentage change.
